

What Is Claimed Is:

1. A method for filtering an electronic document to determine whether content in the electronic document is inappropriate to users, the method comprising:

- parsing the electronic document to extract the relevant words in the document;
- assigning a weight to each relevant word in the document;
- extracting a plurality of contexts for each relevant word in the document from a thesaurus dictionary;
- assigning a weight to each context in the plurality of contexts;
- determining which contexts in the plurality of contexts are the most important contexts in the document;
- and
- restricting access to the electronic document if the most important contexts in the document are in a list of restricted contexts.

2. The method of claim 1, further comprising restricting access to the electronic document if the electronic document is a web page and the web page is in a list of restricted web pages.

3. The method of claim 1, wherein assigning a weight to each relevant word in the document comprises assigning a weight according to one or more formatting parameters selected from a group of formatting parameters consisting of: number of times the relevant word appears in the document; total number of words in the document; format of the relevant word in the document; format of a

105290-00000000

access to the electronic document if the most important contexts in the document are in a list of restricted contexts comprises displaying a message to the user notifying the user that the document has inappropriate content.

9. A method for filtering an electronic document to determine whether content in the electronic document is inappropriate to users, the method comprising:

checking whether the electronic document is in a list of restricted electronic documents;

determining whether the electronic documents contains an unacceptable number of inappropriate words or pictures;

extracting a plurality of contexts for each word in the document from a thesaurus dictionary;

assigning a weight to each context in the plurality of contexts;

determining which contexts in the plurality of contexts are the most important contexts in the document; and

restricting access to the electronic document if the most important contexts in the document are in a list of restricted contexts.

10. The method of claim 9, wherein the electronic document comprises one or more electronic documents selected from a group consisting of: a web page; a newsgroup transcript; a chat room transcript; an e-mail; a document in a CD; a document in a DVD; and a document in a disk.
